

TANK NEUTRALIZER WITH pH POWER PELLETS®

NBT-400

Acidic Condensate Neutralizer for High-Efficiency, Gas Boiler, Furnace, and Water Heater Installations.

Introducing our latest innovation in our tank neutralizer lineup. The new Model NBT-400 condensate neutralizer is a compact solution designed for residential installations up to 400 MBH (3 GPH). The NBT-400 features a removable tray to enable quick and easy replacement of the pH Power Pellets® media. This space-saving, yet high-capacity solution is engineered for floor or wall mounting with its built-in brackets.

WHO IS JJM®?

JJM Alkaline Technologies® is the industry pioneer and leading manufacturer of condensate neutralizers for the heating and plumbing industries. We built the first one. Now, we build the best ones.

We craft reliable solutions for the treatment of acidic condensate produced by today's high-efficiency, gas-fired heating appliances. JJM® products are designed with industry pros in mind: versatile to install, quick and easy to service, and purpose-built for specific gas-fired installations.

WHY JJM®?

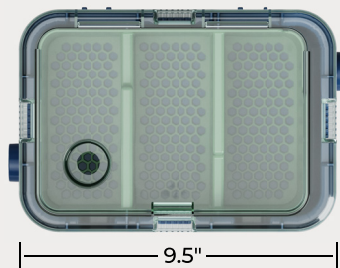

- We do one thing, and we do it right.
- Trust us, we invented the category.
- We have reliable solutions for every install.
- Quick ship times.
- Responsive, ready, and really nice people.
- High performance, low maintenance, great value.
- Proudly Made in America.

NBT-400

**TANK NEUTRALIZER
WITH pH POWER PELLETS®**

Built for Versatile Residential Installations

The Model NBT-400 condensate neutralizer is a compact tank-style solution built specifically for residential applications, such as furnaces and tankless water heaters. The compact, high-capacity design is rated for up to 400 MBH (3 GPH of condensate) and features built-in brackets enabling wall-hung or floor-mounted installations.

Comply with Codes and Do Right By Homeowners

The NBT-400 ensures the safe treatment of acidic condensate in compliance with industry, federal, state, and local codes. With the NBT-400, HVAC and plumbing pros can do right by homeowners to protect their facilities and the environment from damage.

Easy Routine Maintenance

The NBT-400 features a removable tray, which ensures quick and easy routine replacement of the pH Power Pellets® media.
