

**TANK NEUTRALIZER + BUILT-IN
CONDENSATE PUMP
WITH pH POWER PELLETS®**

NBT-400P

Acidic Condensate Neutralizer for Residential Condensing Boiler, Furnace, and Water Heater Installations.

The NBT-400P is a game-changing innovation from JJM® that is ideal for combination residential units. The NBT-400P features two distinct intake ports and condensate chambers to handle both heating and conditioning condensate flow. Further, the NBT-400P includes a built-in Little Giant® condensate pump to enable safe discharge to a remote drain.

WHO IS JJM®?

JJM Alkaline Technologies® is the innovator and industry leader of condensate neutralizers for the heating and plumbing industries. We built the first one. Now we build the best ones.

We craft reliable solutions for the treatment of acidic condensate produced by today's condensing, gas-fired heating appliances. Maybe your local codes require it? Maybe you don't want damage to appliances or property? Maybe you just believe there's a right way to do things? Whatever your reason, JJM® is the add-on that adds up.

WHY JJM®?

- We do one thing, and we do it right.
- We have reliable solutions for every install.
- 3 – 5 days from order to delivery.
- Responsive, ready and really nice people.
- Trust us, we invented the category.
- High performance, low maintenance, low price.
- The green solution to neutralization.

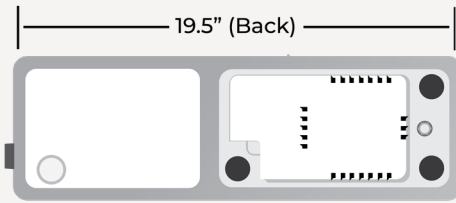

Not sure which JJM® model is best for your needs?

Designed for Residential Combination Heating Units

The JJM® NBT-400P is designed to work with residential combination heating and air conditioning units. The NBT-400P is equipped to handle both streams of condensate with (2) inlet port options for use with floor-mounted or wall-mounted heaters and (2) inlet ports for air conditioning condensate.

Built-In Little Giant® Pump

With its built-in Little Giant® pump, the JJM® NBT-400P provides an all-in-one solution for efficient disposal of heater and air conditioning condensate to remote drainage.

Ensure Compliance with Regulatory Codes and Protect the Environment

The JJM® NBT-400P is an easy and necessary accessory to condensing residential heaters. The NBT-400P ensures the safe treatment of acidic condensate in compliance with industry, federal, state, and local codes to protect homes and the environment.

Easy Routine Maintenance

The NBT-400P features a removable tray, which ensures quick and easy routine replacement of the pH Power Pellets® media.

CHANGE THE BALANCE. NEVER SETTLE.

NBT-400P SPECIFICATIONS

Part No.	7101	MFK	Little Giant®
MBH	400	Model	VCMA-20ULS
GPH	3	Power Supply	115 V / 60Hz
Material	ABS,PET	Amps	1.5
Pellets	2.5 lbs	Watts	93
Inlet	3/4"	Safety Switch	Yes
		Max Head	20 Ft
