VERTICAL MOUNT NEUTRALIZER WITH pH POWER PELLETS®

WHO IS JJM®?

JJM Alkaline Technologies® is the innovator and industry leader of condensate neutralizers for the heating and plumbing industries. We built the first one. Now we build the best ones.

We craft reliable solutions for the treatment of acidic condensate produced by today's condensing, gas-fired heating appliances. Maybe your local codes require it? Maybe you don't want damage to appliances or property? Maybe you just believe there's a right way to do things? Whatever your reason, JJM® is the add-on that adds up.

WHY JJM®?

- We do one thing, and we do it right.
- We have reliable solutions for every install.
- 3-5 days from order to shipping.
- Responsive, ready and really nice people.
- Trust us, we invented the category.
- High performance, low maintenance, great value
- The green solution to neutralization.

GPH	1.6
Material	ABS,PET
Pellets	1.6 lbs.
Inlet	3/4"
PH Power Pellets® Refill	V-200R

V-200

VERTICAL MOUNT NEUTRALIZER

WITH pH POWER PELLETS®

Designed for Residential Wall-Hung Heating Units

The JJM® V-200 is designed to work with wall-hung residential heating units. The V-200 is equipped to handle condensate from wall-hung boilers or tankless water heaters with (2) outlet port options for versatile configuration.

Ensure Compliance with Regulatory Codes and Protect the Environment

The JJM® V-200 is an easy and necessary accessory to condensing residential heaters. The V-200 ensures the safe treatment of acidic condensate in compliance with industry, federal, state, and local codes to protect homes and the environment.

Easy Routine Maintenance

The V-200 design enables quick and easy service without needing to disconnect fittings connections. The pH Power Pellets® refill can be replaced with just one hand.
